

Digital Documentation Class 10 Notes

Based on CBSE Information Technology Textbook (402)

Introduction

This document covers the complete Digital Documentation chapter for Class 10 Information Technology (Subject Code 402). These notes include practical examples and step-by-step procedures for LibreOffice Writer.

1 Introduction to Styles

1.1 What is a Style?

Definition

A **Style** is a collection of formats (font, size, color, alignment, etc.) that can be applied to text, paragraphs, pages, or other elements in a document. Styles help maintain consistency and save time when formatting documents.

Example

Scenario: Creating a school project report

Use of Styles:

- **Heading 1:** Title of chapters (16pt, Bold, Centered)
- **Heading 2:** Sub-sections (14pt, Bold, Left-aligned)
- **Body Text:** Main content (12pt, Justified)
- **Caption:** Image descriptions (10pt, Italic)

1.2 Types of Styles in LibreOffice Writer

1.3 Applying Styles - Practical Examples

Steps

Method 1: Using Styles and Formatting Window

Step 1: Select the text you want to format

Step 2: Press F11 or go to **Format → Styles and Formatting**

Step 3: Double-click on the desired style (e.g., "Heading 1")

Step 4: The style will be applied instantly

Style Type	Shortcut	Purpose and Examples
Page Style	F11 → First Icon	Controls page layout: margins, orientation, headers/footers
Paragraph Style	F11 → Second Icon	Formats complete paragraphs: alignment, spacing, indentation
Character Style	F11 → Third Icon	Formats text within paragraphs: bold, italic, color
Frame Style	F11 → Fourth Icon	Formats frames/containers: borders, background, wrapping
List Style	F11 → Fifth Icon	Creates numbered/bulleted lists: indentation, bullet types
Table Style	F11 → Sixth Icon	Formats tables: borders, shading, text alignment

Table 1: Types of Styles in LibreOffice Writer

Example

Practical Application:

- **Chapter Title:** Apply "Heading 1" style
- **Section:** Apply "Heading 2" style
- **Important Points:** Apply "Emphasis" character style
- **Quotations:** Apply "Quotations" paragraph style

Steps

Method 2: Fill Format Mode (Quick Formatting)

Step 1: Select already formatted text

Step 2: Click the **Fill Format** button in Styles window

Step 3: Click on other text sections to apply the same formatting

Step 4: Press **ESC** to exit Fill Format mode

1.4 Creating Custom Styles

Steps

Creating New Style from Selection:

Step 1: Format text with desired attributes (font, size, color, etc.)

Step 2: Select the formatted text

Step 3: Open Styles window (F11)

Step 4: Click **New Style from Selection** button

Step 5: Enter name: e.g., "MyImportantText"

Step 6: Click OK

Note

Pro Tip: Name styles descriptively:

- **Good:** "ReportTitle", "StudentName", "ReferenceText"
- **Poor:** "Style1", "aaa", "newstyle"

2 Working with Images

2.1 Inserting Images - Multiple Methods

Method	Procedure	Best Used When
Insert Dialog	Insert → Image → Select file → Open	Precise placement needed
Drag and Drop	Drag from folder → Drop in document	Quick insertion from file explorer
Copy-Paste	Copy image → Paste in document	Copying from web or other documents
Linked Image	Insert → Image → Check "Link" option	Same image used multiple times

Table 2: Methods to Insert Images in LibreOffice

2.2 Image Modification Examples

Example

Project Report Image Requirements:

1. **Cover Photo:** Apply "Watermark" effect, 50% transparency
2. **Diagram:** Add border, center alignment
3. **Screenshots:** Apply "Sharpen" filter for clarity
4. **Graph:** Crop unnecessary white space

2.3 Image Cropping - Practical Example

Steps

Cropping an Image for Profile Picture:

- Step 1: Insert the original photograph
- Step 2: Right-click → Picture → Crop
- Step 3: Adjust crop handles to focus on face
- Step 4: Choose **Keep Scale** to maintain proportions
- Step 5: Apply "Round Corners" from Picture toolbar
- Step 6: Add subtle border

2.4 Image Positioning Options

Option	Usage Example
Arrangement	Send diagram behind text, bring logo to front
Anchoring	Anchor logo to page (stays fixed), anchor diagram to paragraph
Alignment	Align images left, center, or right relative to text
Text Wrap- ping	Square wrap for diagrams, tight wrap for irregular shapes

Table 3: Image Positioning Applications

3 Advanced Features

3.1 Table of Contents (ToC)

Steps

Creating Automatic ToC for School Project:

Step 1: Apply proper heading styles throughout document:

- Chapter titles: **Heading 1**
- Sections: **Heading 2**
- Sub-sections: **Heading 3**

Step 2: Place cursor where ToC should appear

Step 3: Go to Insert → Table of Contents and Index → Table of Contents, Index or Bibliography

Step 4: Configure settings:

- Title: "Table of Contents"
- Levels: 1-3
- Check "Protected against manual changes"

Step 5: Click OK

Step 6: To update: Right-click on ToC → Update Index

Example

Sample ToC Structure:

TABLE OF CONTENTS

1. INTRODUCTION.....	1
1.1 Background.....	2
1.2 Objectives.....	3
2. LITERATURE REVIEW.....	4
2.1 Previous Studies.....	5
2.2 Research Gap.....	6
3. METHODOLOGY.....	7

3.2 Templates

Steps

Creating School Letterhead Template:

Step 1: Create new document

Step 2: Insert school logo at top (Anchor: To Page)

Step 3: Add school name, address (Center alignment)

Step 4: Add horizontal line below header

Step 5: Set footer with page numbers

Step 6: Save as template: File → Templates → Save as Template

Step 7: Name: "SchoolLetterhead"

Step 8: Category: "My Templates"

Steps

Using Template for Assignment:

Step 1: File → New → Templates

Step 2: Select "AssignmentTemplate"

Step 3: Fill in details:

- Student Name: _____
- Class/Section: _____
- Roll No.: _____
- Date: _____

Step 4: Start typing assignment content

3.3 Track Changes - Collaborative Example

Example

Group Project Review Scenario:

- **Student A:** Writes initial draft
- **Student B:** Reviews with Track Changes ON
 - Adds suggestions in different color
 - Comments on unclear sections
 - Corrects spelling mistakes
- **Student C:** Final review
 - Accepts valid changes
 - Rejects unnecessary modifications
 - Adds final comments

Steps

Using Track Changes for Assignment Correction:

- Step 1: Teacher opens student's assignment
- Step 2: Click **Edit** → **Track Changes** → **Record Changes**
- Step 3: Make corrections (shown in red)
- Step 4: Add comments for explanations
- Step 5: Save and return to student
- Step 6: Student reviews changes, accepts/rejects as needed

Practical Exercises

Exercise 1: Create a Professional Resume

- Use different paragraph styles for sections
- Insert professional photo with proper cropping
- Use table for educational qualifications
- Apply character styles for emphasis
- Create custom style for contact information

Exercise 2: Design a School Magazine Page

- Create template with two-column layout
- Insert multiple images with text wrapping
- Apply artistic filters to photos
- Create pull quotes with special formatting
- Add page border and header/footer

Exercise 3: Collaborative Document Editing

- Create document with track changes enabled
- Add at least 5 comments
- Make 10 different types of changes
- Accept/reject changes systematically
- Generate final version

Note

Exam Tips:

1. Remember shortcut keys: F11 (Styles), Ctrl+Shift+N (Templates)
2. Understand difference between "Keep Scale" and "Keep Image Size"
3. Practice creating Table of Contents with multiple levels
4. Know how to accept/reject track changes individually
5. Remember template file extension: .ott

Keyboard Shortcuts Quick Reference

Shortcut	Function
F11	Open Styles and Formatting window
Ctrl+Shift+N	Open Template Manager
Ctrl+Shift+F	Fill Format mode
Ctrl+Shift+C	Copy formatting
Ctrl+Shift+V	Paste formatting
Ctrl+F11	Create new style
Ctrl+0	Apply Normal paragraph style
Ctrl+1	Apply Heading 1 style
Ctrl+2	Apply Heading 2 style
